

Biotinylated Cynomolgus/Rhesus macaque FcRn Protein

Cat. No. FRN-CM401B

Description	
Source	Recombinant Biotinylated Cynomolgus/Rhesus macaque FcRn Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus. It contains Ala24-Ser297(FCGRT) and Ile21-Met119(B2M).
Accession	Q8SPV9&Q8SPW0
Molecular Weight	The protein has a predicted MW of 46.5 kDa. Due to glycosylation, the protein migrates to 50-60 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
The neonatal Fc receptor (FCRN) is an approximately 45 kDa transmembrane glycoprotein with structural homology to MHC class I proteins. It is widely expressed in endothelial and epithelial cells and plays an important role in IgG homeostasis and antigen presentation by dendritic cells.FCGRT & B2M heterodimer protein (FcRn complex) consist of two subunits: p51, and p14 , and forms an MHC class I-like heterodimer.	

Assay Data

Bis-Tris PAGE

Biotinylated Cynomolgus/Rhesus macaque FcRn on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Biotinylated Cynomolgus/Rhesus macaque FcRn Protein

Cat. No. FRN-CM401B

Assay Data

The purity of Biotinylated Cynomolgus/Rhesus macaque FcRn is greater than 95% as determined by SEC-HPLC.

SPR Data

Biotinylated Cynomolgus/Rhesus macaque FcRn, His Tag captured on CM5 Chip via Anti-His Antibody can bind Rituximab, hFc Tag with an affinity constant of 0.48 μM as determined in SPR assay (Biacore T200).
